# CRAYVALLAC® MT

Micronised polyamide modified hydrogenated castor oil rheology modifier

## **Castor derivative**

## **TYPICAL CHARACTERISTICS**

Nature Castor derivatives

Appearance Off-white micronized powder

Solid Content (%) 100
Active Content (%) 100
Specific gravity 1.02

Particle size distribution DV.2 min: 4 μm / DV.8 max: 20 μm

## **DESCRIPTION**

CRAYVALLAC® MT is a micronised amide modified hydrogenated castor oil rheology modifier for solvent-based and solvent-free systems. CRAYVALLAC® MT is suited to systems based on aliphatic hydrocarbons, aromatic hydrocarbons and aromatic hydrocarbon/alcohol blends. Compared to the most basic hydrogenated castor oil based rheology modifiers, CRAYVALLAC® MT is more tolerant to stronger solvents. CRAYVALLAC® MT particles are converted upon activation into an interacting network of fibre like particles. This network gives rise to the final coating's shear thinning rheology. This shear thinning characteristic provides a very high viscosity under the low shear rates associated with sedimentation, and a low viscosity at the much higher application shear rates. The net result is excellent control of sedimentation combined with ease of application.

#### RECOMMENDED ADDITION LEVEL

0.2-1.5% under heat and shear

## **STANDARD PACKAGING**

Other packaging may be available upon request

• 20 Kg Bag

## **HANDLING & STORAGE**

It should be stored in the original containers in a dry place at temperatures between 5°C (41°F) and 30°C (86°F). Avoid exposure to direct sunlight or frost. In these conditions, this product should be used within 48 months from production.

# **PROCESSING INSTRUCTIONS**

CRAYVALLAC® MT is best incorporated during the pigment dispersion stage using a high-speed disperser. In order to obtain the maximum performance from CRAYVALLAC® MT, the dispersion process should be maintained for a period of 20 – 40 minutes at the recommended temperature: Aliphatic hydrocarbons: 35 - 75°C (95 - 167°F) Aromatic hydrocarbons: 30 - 50°C (86 - 122°F) Aromatic hydrocarbon/Alcohol blends: 30 - 50°C (86 - 122°F) Solvent free epoxy coatings: 40 - 60°C (104 - 140°F) In addition to solvent-based coatings applications, CRAYVALLAC® MT has been used successfully in a multitude of other applications such as inks, adhesives, mastics, caulks, sealants, fillers, greases and lubricants.

# **HEALTH AND ENVIRONMENTAL DATA**

For safe handling please refer to the Safety Data Sheet. For more information about health and environmental data, please contact us.

#### **MARKET**

## **Electrical & Electronics**

## **Coatings & Inks**

- Architectural Coating
- Graphic Arts
- Industrial Coating

#### **Adhesives & Sealants**

- Assembly
- Other Adhesives
- Sealants

## **KEY BENEFITS**

## **FORMULATION**

Easy handling

## **STORAGE**

- Antisettling
- In-can appearence
- Syneresis resistance
- Viscosity stability

## **APPLICATION**

- Edge-coverage
- Sag resistance
- Sprayability

## FILM PROPERTIES

- Anticorrosion
- Chemical resistance
- Levelling

APEO freeBacteria resistance

Bio content (%)Heavy metal free

Heavy metal freeSolvent-free

99 Yes Yes

Yes

Yes

## **THICKENING MECHANISM**

Non Associative

## VISCOSITY CONTRIBUTION

Low Shear contribution
